PREFACE
The cooperative was established in Bedya town in Salfets governorate in 1964, and got the official registration No. (22) of the Hashemite Kingdom and currently No. (248) in the directorate of cooperation and Ministry of Labor in the Palestinian National Authority, and within its membership it includes a group of farmers from Bedya and 12 neighboring villages. It works within the fields of planting olives trees and producing olive oil in the villages of Bedya area (Bedya, Qarawa Bani Hassan, Sarta, Masha, Snerya, Azzoun, Atma, Khirbet Kfur Thilith, Alzawy, Rafat, Deir Ballout and Hares) including 461 members. The objective behind establishing this cooperative is to market the farmers’ products of olive oil since the cooperative is considered as one cooperative of Union of Cooperative Associations for pressing olives in Palestine, and the cooperative has an automatic modern olives press which had the license as well as certificates for quality systems, organic farming and fair trade.

COOPERATIVE’S VISION
We look forward to being a pioneering agricultural cooperative capable to meet all the requirements of member farmers in a professional administrative organized way with high transparency.

COOPERATIVE’S MISSION
Assisting member farmers and improving their economic, social and environmental circumstances by building their technical and administrative capacities and helping them to market and promote their products with fair competitive prices locally and internationally in a way that makes them capable to protect themselves from exploitation as well as reinforcing their central role in the homeland.

COOPERATIVE’S OBJECTIVES
The cooperative aims at meeting the agricultural and marketing needs to improve their economic, social and environmental circumstances and organizing them according to the cooperative principles, morals and values which based on self help, democracy, equality, justice and solidarity via these activities:

- Providing the agricultural and plants production’s requirements the farmer needs in terms of good quality and suitable prices continuously.
- Securing the guiding and technical services for the agricultural and plants’ production that farmers need.
- Directing members to develop their farms, improve its administration and quality of production.
- Enabling members to get the services provided by the cooperative equally.
- Working to supply with funding source in line with the cooperative’s work.

ACTIVITIES AND ACHIEVEMENTS
- Implementing joint projects with cooperatives or organizations related with the agricultural projects to serve farmers.

COOPERATIVE’S ELEMENTS AND PROPERTIES
The cooperative has a land area with 3 dunums in a location in the middle of Bedya town, and a 1000 meters square building is constructed on it. The cooperative owns an automatic oil press (Brilzly super 2) with 1750 K/Hour productivity’s capacity, and the cooperative has a financial, accounting and internal systems for its works, and it has the certificates of fair trade, organic farming and membership in the association of Palestinian fair trade producers. The cooperative and oil press has a storing capacity until 12 tons of Stainless Steel tanks to store olive oil, a laboratory for checking the quality of oil and classifying it according to acidity as well as Peroxide, it has also a computer, a printer, telephone, fax, office furniture, plastic boxes, secatures. The cooperative as well has packages(containers), special label, a trade name for the olive oil produced through it.

CHALLENGES AND ASPIRATIONS
- Lack of full time employee and depending on volunteers from the board.
- Lack of commitment by members regarding pressing, storing and marketing through the cooperative.
- The high cost for getting the license and renewal for the certificates of organic farming as well as fair trade.

PREFACE
The idea for establishing the agricultural cooperative in the location of Western Bani Zeid in Ramallah governorate which combines the two villages Beit Reema and Kfur Ein arose via the support provided by project of “Increasing Marketing Competitive Abilities for Palestinian Olive Oil” implemented by Palestinian Agricultural Relief Committee (PARC) by a group of pioneering farmers in the location. The cooperative got the license from the Palestinian Ministry of Labor on 27/8/2009 under registration No. 1445 as an agricultural cooperative association specialized in producing and marketing organic oil as well as improving the quality of the agricultural production particularly olive oil which is considered as the main production in addition to the cooperative’s interest in defending farmers’ rights and organizing them within a societal institutional body besides conquering the state of regression and decrease in the prices of Palestinian olive oil in line with quality standards to produce marketable olive oil with high quality to be promoted and marketed within international markers with fair competitive prices. The cooperative includes 18 members who won about 574 dunums.

COOPERATIVE’S VISION
We look forward to being a pioneering local organization which has a decisive role in providing a better life for its members in the economic, social and environmental fields, starting from the technical support until marketing their products within local and international markets with fair competitive prices.

COOPERATIVE’S MISSION
Coordinating members’ efforts to develop production’s mechanisms and diversification, improving the marketing circumstances to raise the financial return for oil, protecting and releasing the interests of cooperative’s members from monopoly’s exploitation. Besides achieving a societal efficient communication within work’s program for self and societal development so as to improve the economic, social and environmental conditions for member farmers and for the society generally.

COOPERATIVE’S OBJECTIVES
• Enrooting the concept of cooperative work among member farmers.
• Contributing to the improvement of economic and social conditions for member farmers.
• Contributing to offering production’s necessary requirements with good prices.
• Deepening the value of belonging among members, workers and volunteers of the cooperative.
• Raising the efficiency of cooperative’s workers, members and volunteers.
• Implementing agricultural projects in collaboration with partner cooperatives.
• Establishing exhibitions and stores necessary for conducting the cooperative’s activities in the suitable fields of marketing, storing and manufacturing.

ACTIVITIES AND ACHIEVEMENTS
• Disseminating the idea of organic farming among farmers in the region.
• Attaining the certificates of organic farming and fair trade.
• Membership in the union of cooperative associations for pressing oil.
• Signing a memorandum of understanding with three surrounding cooperatives to work collectively.
• Partnership with three cooperatives in Compost project.
• Partnership in implementing the project of establishing standard olives farms with 200 dunums area in collaboration with PARC.
• Implementing the project of “increasing the competitive capacity for olive oil” with PARC from 2008 to 2010.

COOPERATIVE’S ELEMENTS AND PROPERTIES
The cooperative is funded and managed by its members and it provides agricultural services for member farmers. It has a financial, accounting and internal systems for its works. As well, the cooperative has the certificates of organic farming and fair trade in addition to membership in the association of Palestinian fair trade producers. It has a leased venue, office and store and efforts are unified to build a special venue for the cooperative, it has also Stainless steel tanks (2 tanks with 5 tons and 1 tank with 1 ton) to store olive oil, a laboratory for checking the quality if oil, a computer, a printer, telephone, fax, office furniture, plastic boxes and secateurs.

CHALLENGES AND ASPIRATIONS
• Lack of resources for the cooperative which is reflected in weakness within performance and reduction in the capital which imply finding a profit-making project to cover administrative costs and petty expenses.
• There are some obstacles in the process of marketing the product (olive oil) like the low price due to the increasing number of competitors within international markets in addition to the high cost.
• The weakness of pressing and collective storing processes and the significance to apply it on the ground which will facilitate marketing.
